

I am disgusted in how you people have been regulating (or not) the media. Now you want to censor everything because a portion of a breast was bared? Ridiculous! Murder and violence on TV is fine, but breasts are obscene? God designed breasts and saying that they are obscene is slapping God right in the face! And when you dump all of the laws protecting consumers from media monopolies, giving giants like Clear Channel clear and total reign over whole markets, you cannot possibly say that you care about the public good! There is absolutely no localism in our radio and Clear Channel has skirted even what is left of any laws to control virtually every radio station in town. This is criminal and should be corrected!
